

The Journal Subject Area

Scientific-theoretical journal “Proceedings of Gorsky State Agrarian University” aims to inform the scientific community and practitioners of the results of original scientific research in various fields of agricultural science, to help graduate students and young scientists to publish research results in the process of working on theses.

Currently the journal is included into the List of leading peer-reviewed scientific journals and issues, recommended by the Supreme Attestation Commission, which should publish major scientific results of D.Sc. and Ph.D. theses in:

- 1.5.20. - Biological resources (Biological sciences),
- 4.1.1. - General agriculture and crop production (Agricultural sciences),
- 4.1.3. - Agrochemistry, agrosoil science, plant protection and quarantine (Agricultural sciences),
- 4.2.1. - Animal pathology, morphology, physiology, pharmacology and toxicology (Veterinary Sciences),
- 4.2.4. - Private animal husbandry, feeding, fodder preparation and livestock production technologies (Agricultural sciences).

Authors of scientific papers should bear in mind that the main research theme of Gorsky State Agrarian University is “Scientific support for sustainable development of the agro-industrial complex of mountain and foothill areas”.
